NAME: GWT-500S Double Station Large Crochet Machine

Max. Wire Diameter:	2.8 mm
Min. Wire Diameter:	0.4mm
Max. Finished O.D.:	60mm
Min. Finished O.D.:	12mm
Min. Finished I.D.:	5mm
Max. Finished Height:	30mm
Line spacing control:	Programming control
Segmented winding control:	Programming control
Cumulative winding control:	Programming control
Cable motor:	Hybrid stepper motor
Main motor:	Double servo motor
Power demand:	220V/110V, 50/60HZ
Machine size :	1200*1000*1800 cm
Winding speed:	Variable , fastest 400 TPM
Weight:	180KG

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area,Dongli Distr,Tianjin,China.

GWT-500S series double-position crochet machine designed for thick wire winding inductance, equipment automatic loading and unloading, double-position work at the same time, high efficiency;

At the same time can achieve single winding, differential mode, common mode, multi-winding, butterfly winding and other functions to meet the home appliances, photovoltaic, automotive, lighting and other fields of product requirements

Functional characteristics:

1. Double-position winding, a winding production of two products
2. Can single wire or double wire winding, optional cross winding structure.
3. All-angle arbitrary rotation of the winding coil, can achieve single winding, common mode, differential mode, multi-layer and other winding methods, manual single-step and fully automatic operation;
crochet Assembly with a detection switch, can automatically detect the number of turns;
4. Optional tail line head wrap glue function, to prevent injury line, Optional belt cutting, cutting rod function
5. PLC control, line distance can be adjusted at will, control accuracy,

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1. General package (Paper carton or plastic bag): For small equipped parts for Multi Spindle Coil Winding

Machine, Package it with form and pack paper to guarantee unbroken during the transport.

2. Wooden case package: For larger scale Multi Spindle Coil Winding

Machine, we have special skilled

carpenter, who would make the proper wooden case with exact thickness, density, length.

The up arrow ↑ marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.
